BOAT FLOORING

TRANSFORM YOUR BOAT WITH CUSTOMISABLE
EVA TRIDECK FLOORING

neptuneboatflooring.com.au

Neptune puts your boat in another class

Neptune *Trideck*, a superior EVA non-slip flooring product will revolutionise your boat's appearance, function and safety. *Trideck* looks great, is durable, non-absorbent and easy to clean. *Trideck* is the perfect way to transform any boat, yacht, kayak or any other marine application and will look stunning for years.

Neptune *Trideck* consists of premium grade composite foam with superior weight, strength and insulation properties. It offers exceptional traction even when wet and the range of customisation options, colours and patterns are stunning.

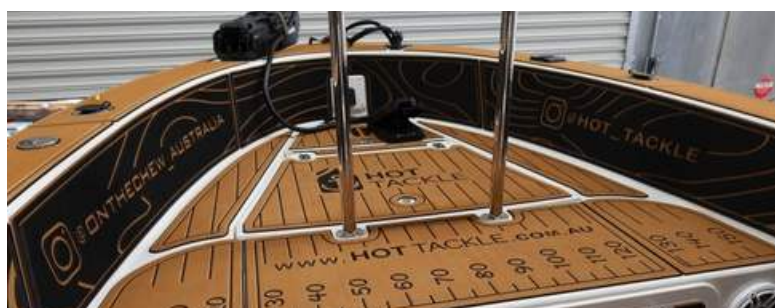

Where can I use Trideck

Trideck can be customised with logos or personalised designs and to any size and shape with millimetre precision. The 3M pressure sensitive adhesive means it's easy to install. The hard-wearing, easy to clean foam is perfect for all boating and marine craft applications including:

- Fishing boats, speed boats and other motor boats
- Yachts and large-scale launches
- Jet Skis
- Flooring (interior and exterior)
- Swim platforms & foot wells
- Coaming bolsters, pads & gunwales

Neptune Trideck is flexible for use on flat or curved surfaces and has a high resistance to UV and Salt water exposure.

Benefits you can't Ignore

- **Improves safety with its non-slip surface**
Dry or wet, the non-absorbent surface is designed for exceptional slip-resistance.
- **Cushions your body against injury and fatigue**
The closed-cell foam is beautifully soft to walk on, great for long days hauling in the fish or lounging in the sun.
- **Enables silent movement so you don't scare the fish**
Sounds from on-board movements can travel a long way under water. The insulating foam maximises your chances against those wily fish
- **Endures tough love, tough climate, salt & UV exposure**
Trideck can take just about everything you, the weather, partying guests and the fish can throw at it.

How long will it last?

EVA (Ethylene Vinyl Acetate) is super tough and may last up to 10 years with proper care and light cleaning. *Trideck* features exceptional abrasion resistance, is highly resistant to salt and UV exposure and it's easy to clean. *Trideck* is produced with 3M adhesives to ensure our customers get the best possible product available.

Manufactured with trusted 3M Adhesive to bring you the best quality product on the market

Colours

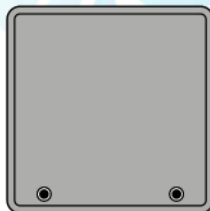

Neptune *Trideck* offers several colour options each having unique benefits that can complement different boat designs. Natural Teak, for example, delivers a classic and elegant look, while Light Grey provides a modern and sleek appearance.

In addition to these pre-designed colours, Neptune *Trideck* also offers custom-coloured options for boat owners who want something specific.

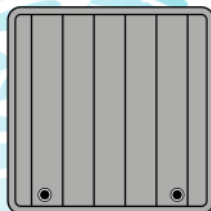

Patterns & designs

You can choose from one of the ten standard patterns or add custom-designed logos, boat names or other personalised designs. Our CAD design software and precision cutting tools can cut patterns with millimetre precision.

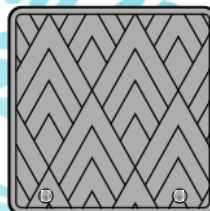

The panel edges feature a refined bevelled edge for a smart finish. This also reduces tripping hazards and protects the edge against lifting.
